Premise: Warner Brothers Studios is well known for creating marvelous movies and many wonderfully entertaining and well-crafted television series, such as the brilliant new *The Flash* on CBS. However, *Freddy's Nightmares* does not fall into this category. A truly horrible horror show, *Freddy's Nightmares* became known mainly for its over-abundance of violence and gore, causing the show to come under considerable criticism from parents and other viewers and it being canceled by some stations because of its unsuitability for younger audiences - unfortunately, the very viewers it was targeted for. This one-hour program, usually revolving around two stories where Freddy is making a nightmare of some victim's life, insulted viewers for two seasons until it was finally yanked from the airwaves.

No More Mr. Nice Guy (airdate: Oct. 8, 1988). The host of the show recounts the events that led to his becoming a master of nightmares: sinister Freddy Krueger, the razor-gloved janitor of the Springwood power plant, is tried for the murders of innocent children, but is acquitted in court because of a technicality. 28

Furious, the parents form a lynch mob and go after the fedora-donned fiend, planning to obtain the revenge the court robbed them of. The parents catch him, and he is burned by an enraged mob led by the parents of the victims. They believe they have obtained revenge against the murderer, but Freddy is far from gone. **Guest cast:** Ian Patrick Williams as Lt.
